

Basic Chemicals:

Product	EC Number	Basis for inclusion in "Candidate List"	Comments
CRN 30		Anthracene content > 0.1 wt %	
Quench Oil Fluxant		Anthracene content > 0.1 wt %	

Based on analysis, two ExxonMobil products (CRN30 and Quench Oil Fluxant) routinely contain at levels >0.1 wt% the substance anthracene (EINECS# 204-371-1) which appears on the candidate list. The Safety Data Sheet, has in accordance with the requirements laid down in Article 31.1c of regulation (EC) no 1907/2006, been updated accordingly to reflect this conclusion.

CRN30 and Quench Oil Fluxant are used primarily by Downstream Users as an intermediate under Strictly Controlled Conditions. Intermediates in accordance with article 2.8 (b) are exempt from authorisation.
